Student Work Tracking App

Mar 2017 to Mar 2017

<https://github.com/omahacodeschool/working-on>

Written in Ruby and running on Sinatra, students can periodically update their instructor with their work status. Students can register themselves using their GitHub username, and their picture will be provided through the GitHub API. All students see a live feed of today's posted updates. The instructor has administrator access to search updates by student and day.

+ employment

QuikTrip

Greenville, SC

New Store Opening Manager/Store Manager 2012 to 2016

Assisted in the opening of a new market for QuikTrip (Greenville/Spartanburg, SC). Helped to grow the market to over 30 locations in under 5 years. Played a key role in the market's growth through the training and development of hundreds of employees, promoting over 25 into management roles and beyond. Additional duties described below.

Omaha, NE

Store Manager 2009 to 2012

In charge of overseeing day to day business operations including: training and developing staff, scheduling employees, maintaining and explaining P&L, cash and inventory control, ordering store merchandise and supplies, vendor relations, maintaining product margins, conducting store team meetings and employee evaluations, and making employee promotion eligibility decisions. Engaged and inspired a team of 50+ employees. Ensured customer and team satisfaction while creating a fast-paced, energetic environment that delivered a consistent QuikTrip brand experience.
